Students interested in multidisciplinary research in at the Interface between Chemistry and Biological Sciences are invited to apply. The summer program will run from May 22 to July 28, 2017, and will provide a $5,000 stipend plus campus housing. In addition, funds are available for a trip to a scientific meeting for each participant. Priority will be given to those students with an expressed interest in a graduate degree and research careers.

Requirements: Students should be U.S. citizens or permanent residents. Applicants should have a GPA of 3.0 or better, and should have completed their sophomore or junior year by the beginning of the summer program.

Application form and further information can be downloaded from www.as.miami.edu/reu. Contact Prof. Marc Knecht (chemreu@miami.edu) for any questions.

Deadline: Applications are due by February 15, 2016.
