

Making Science Sensible

University of Miami senior Farrah Mohammed returned to her roots, Miami Southridge Senior High School, as a mentor, just as she was mentored by a UM student when she attended high school there. Farrah was a member of Science Made Sensible, a program that focuses on advancing the scientific curiosity and learning of middle school and high school students by incorporating hands-on and inquiry-based activities into the curriculum.

UM Senior Awarded for Work with NGO Abroad

When senior Alice Woods left Cape Town in May 2015 after studying abroad for a semester, she knew she wanted to return. After studying abroad again in spring 2016, she still couldn't let go of South Africa, so she stayed for three more months.

Class of '17

Morgan Owens

Natalia Beadle

Josh Myers

**Political Science,
Women's & Gender Studies**

"Freshman year, I joined SpectrUM (the undergraduate LGBTQ+ student organization) and was able to represent UM at the National LGBTQ Task Force's annual convention, "Creating Change." It completely changed my perspective on my education and what I ought to be spending my time doing while at UM, ultimately inspiring me to push for the establishment of the LGBTQ Student Center."

**Neuroscience,
Religious Studies**

"I attended a service trip to Guatemala with Miami International Outreach. We worked on various initiatives, including building houses, constructing stoves, working on a reforestation project, and more. We learned a lot about the people of Guatemala and Mayan culture. This trip instilled in me a passion for community service, which I've carried with me throughout my undergraduate career, and will carry into the future. "

Philosophy, Psychology

"My favorite UM memory are my experiences on the IMPACT Leadership Retreat. When I went on the retreat as a participant my freshman year it gave me the time to introspect on what I was passionate about and it completely catalyzed my college experience. I have had the honor of serving as a facilitator and coordinator each subsequent year and giving other freshman the same amazing experience I had has been the most rewarding thing I have done in college."
